and Carlsbad
Internationals.

the new 400cc Moto Cross

Wrap the throttle on the new Husky 400cc Moto Cross and you not only find out what it can do, but also what you can do. It's that kind of machine.

Not for everyone, to be sure. But the seasoned rider will find more power, quicker response and faster handling that will give him the competitive edge.

The new power comes from the biggest engine in Husky history, with a beefed up output shaft and a larger cone from the output pinion. It puts out 40 brake horse power at 6500 rpm.

A new gearbox, with higher modules in 2nd, 3rd, and 4th, brings that lowdown torque up quickly to just what the course demands. And a larger, 21" front wheel, on a

54 inch wheel base, gives you quicker handling for every situation.

Add a new rear hub with a larger brake diameter, new flywheel, stronger axle, longer saddle cushion up front, stronger mud guard attachment and new, heavy duty Trelleborg tires, and you have the top of the Husky line.

See the new 400cc Moto Cross today. Measure your own skill and spirit against the finest quality and performance Husqvarna has produced.

Some dealerships are available. Write or call:

Eastern Distributor: Penton Imports, 1423 Foster Park Road, Amherst, Ohio • Western Distributor: MED International, 4790 Palm Avenue, La Mesa, California
